

The purpose of this project is to create a digital magazine cover displaying a public figure.

The assets that i used for this project are actual non fictional photos of my mom that were featured many years ago during her job as a Bear Biologist for the state of NJ Division of Fish Game & Wildlife. You can feel free to google her.

My mom was often featured in magazines and newspapers and traveled to various places to give talks.

I used the transform tool to rotate the magazine cover to a vertical position. I used the scale tool to place the magazine page appropriately on the canvas.

I imported the smaller thumbnail size photos of my mom by copying and pasting them onto the magazine cover.

I used the text tool to write a date for the magazine as well as a name for the magazine.

I used the healing brush tool cover up some original information on the photos and to make my mom"s hair not so gray.

I used the brackets on my keyboard to adjust my healing brush.

I used the magnifying glass on the left side of the screen to zoom in and out of the magazine cover as I worked on it.

I used adjustment layers to adjust the brightness of the photos.

I used the neural filter to colorize the photos.

I used Photoshop express to generate a mock qr code that I copied & pasted onto the digital magazine cover in Photoshop.

It was a bit of a challenge to work with the text tool but I feel confident that I am on my way to becoming a pro at using the text tool.
